Diary:

Work description.

Tuesday, January 28th 2014

It was not until 9:30 before Barge EM 1106 was positioned on the South side of the T1 foundation and a gangway was placed on the footing.

Dutra's plan was to begin the formwork for the exterior wall of the fender modules in order to make the February 2nd & 3rd dates for the closure pour. To that end they began with the removal of the frames for the horizontal jacks on the South side of the T1 foundation.

I talked to Dave Lumsden, superintendent, and told him that prior to the removal of the jacks on modules RN3A & RN2B he should either rectify the situation or have Mike Eddy get concurrence from the designer. The situation as explained in yesterday's diary was in regards to the crushing of concrete on these two modules during the jacking operation. As identified in the attached photos, module RN3A is seriously cracked and the adjacent module RN2B exhibits moderate surface cracks.

I completed the survey on the remaining 3 modules, which I could not complete yesterday for the crew were in the process of adjusting them. This survey was conducted on the following pairs of modules: RN2B &RN3A, RN3A & RN3B, and RN3B & RN1D. The result of this survey is as follows:

Modules	Gap( mm)	Vert'l Off (mm)	Hor Off (mm)	
2B &3A	0-10	< 5	<20	
2B E. of 3A				
3A & 3B	420 (closure)	10-15	10	3A
E. of 3B				
3B & 1D	80	15-20	20	3B
S of 1D				

At the conclusion of the day, I sent an e-mail to Mike Eddy with the aforementioned information and photos; thus augmenting the information sent yesterday. I informed him of the adjustment that need to take place prior to the exterior closure pour. Moreover, I did indicate that the damaged modules need to be repaired.

As of this date, there is chipped concrete on module RN3C that needs to be repaired in addition to the two modules indicated herein. Furthermore, a number 16 rebar on module RN1A is bent beyond repair, which needs to be addressed by Dutra. I have mentioned this to Mike Eddy both verbally and via e-mail. This bar which is located within the wall's shear key, will be buried in the closure pour between modules RN1A

Run date 22-Nov-14
